Highlights:

- Up to 37 companies
- Office space: 155-378 SF
- Warehouse/production space: 550 - 2,400 SF
- 80 percent success rate of graduate companies

Our Goal:

- Provide entrepreneurs with affordable space, shared support services, mentoring, seminars, and networking opportunities

Established in 1994, St. Louis Enterprise Center-Midtown is the only Enterprise Center located in the City of St. Louis. This distinct facility is a joint effort between St. Louis City and County to provide support for area entrepreneurs. It is among few small business incubators to offer specialty space for culinary-related companies.

The 35,000-square-foot incubator not only features kitchen facilities, but also provides office, warehouse, and production space for up to 37 client companies at any given time. Incubator tenants have exclusive access to specialized advisory assistance, educational programs, incubator space, networking opportunities, and mental capital.

The Enterprise Centers provide an entrepreneurial atmosphere where companies from virtually any business sector can launch their startup. With a focus on helping businesses thrive and an 80 percent success rate, our client companies are poised to grow while in the incubator and beyond. The Enterprise Centers' clients are 60 percent woman-, minority, or immigrant-owned. In 2010, the current and graduate clients employed 1,073 full-time employees with gross revenues totalling over \$207 million.
